

## Camel Conference-ROLE OF CAMEL IN FOOD SECURITY UNDER CHANGING CLIMATIC CONDITIONS

### Description

## **ONLINE: INTERNATIONAL CAMEL CONFERENCE (VIRTUAL)- A SERIES OF World CAMEL DAY CELEBRATIONS**

**S e p t 3 0 t h – O c t 1 s t , 2 0 2 1**

### **A World Camel Day Series**

Climate change is a bitter reality and the globe is facing the consequences of this phenomenon. It is imperative to strive for food security in this scenario. The camel is an amazing species along with extraordinary resilience in changing environments. There is a need to explore and share the potential and future of this creature under climate change circumstances. The Department of Livestock Production and Management is taking one step forward to organize the International Camel Conference (Virtual) in collaboration with Camel Association of Pakistan to take advantage of exploring the potential of this creature through cooperation, hard work, research & development to open new doors in the multi-value research aspect. We welcome the dignitaries, researchers, and scholars to this event.

## World Camel Day, 22nd June

June; the harshest month of summer with the longest and hottest days of the year (21 June) in the northern hemisphere, the cradle of camel (old world) domestication. The world is celebrating WCD since 2009 to aware the public and policymakers of the incredible role of the camel. <https://arkbiodiv.com/2020/06/20/history-of-world-camel-day-22-june/amp/>
