

A Claim; 100% Natural Feed for Camels

Description

Dr. Millie Hinkle Claim That

I have a 100% natural formula that I feed the camel. *Within 4 weeks the antibodies, immunoglobulins and antioxidants doubled. This created a Super Milk and this milk is called Cam-Immune.*

Is it Really Improves Camel Health?

The other amazing fact about the special formula I fed the camel is that the camels health drastically improved. The camel in the study were 9-10 year old camel. After consuming my special formula their serum showed the health of only a year old camel. The formula that I feed the camel has also proven to prevent the **replication of SARS, MERS, and Covid 19 viruses** in the camel. Dairies around d the world are concerned about theses viruses with their camel. No camel on my formula has gotten any of these viruses.

Camel is natural reservoir/host of many microorganisms, especially viruses and camel doesn't need any external formula retard replications of viruses or boost camel immunity as camel is naturally immune.

Dr. Raziq Kakar

Camel milk is naturally superior and unique because of the camels' genetics as camel is adapted to the challenging conditions of health like infections and extreme environments like aridity and hot weathers.
